

Diamond wires

Levanto is the leading manufacturer of diamond tools in Finland; we offer diamond solutions based on our own production and imported products of highest quality. Diamond tools have been our main business since 1937. Today we even offer diamond wires for profile and wire saws, as well as tools needed when working with diamond wires.

Diamond wires

A diamond wire enables cutting to different sized pieces. It also makes it possible to cut very high stone and challenging three dimensional shapes.

Additionally, cutting with wire is much more quieter and requires lesser water use than rotary cutting. The power demand is less, which means bigger square meters / kW can be cutted compared to a rotary saw.

Levanto sells diamond wires with good cutting result for both granite and concrete.

Diamond wire for concrete

Ø 10,3 mm / 40 beads/meter

A pre-opened diamond wire with protection spring. Suitable for reinforced concrete.

Diamond wires for granite

For billet and profile saws

Ø 8,3 mm / 36 beads/meter

Ø 10,3 mm / 34 or 36 beads/meter

Diamond wire for quarrying granite

Ø 11,3 mm / 40 beads/meter
