

## Repair concrete permanently in only 10 minutes

Roadware 10 minute Concrete Mender is extremely tough and fixes cracks in only 10 minutes.

Low viscosity for deep penetration. Long lasting repairs that won't get brittle and pop out. Cures in temperatures up to -28 °C which makes it great for freezers and parking houses.

# Roadware 10 minute Concrete Mender

- Two-part hybrid urethane that forms a tough instant polymer concrete.
- Works in temperatures up to -28 °C.
- Cures in 10 minutes in 22°C.
- Low viscosity for deep penetration.
- Long lasting repairs that won't get brittle and pop out.
- In the picture; Concrete Mender as red and concrete as blue.
- Liquid, no shrinkage.
- Self-mixed. No messy pot-mixing or wasted product.
- CE-approved.

## Use and technical specifications

Cure time (22 °C)	10 min
Working temperature	-28 °C....+38 °C
Viscosity	<9 mPas
Compressive strength (with sand)	n. 31 N/mm <sup>2</sup>
Tensile strength	n. 31 N/mm <sup>2</sup>
Solids (%)	98
Elongation (%)	6
Resistance to chemical attack	Excellent
V.O.C. (mixed)	5,5 g/l
Mixing ratio	1:1
Packaging	300 x 300 ml
Cured color	Grey
Storage temperature	+15 °C ... +26 °C
